

SUBJECT: Communist Propaganda on the Partial Test Ban Treaty

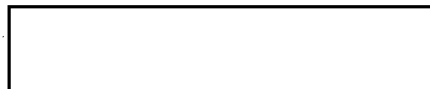

The attached package, consisting of three Foreign Broadcast Information Service publications, may be of value in gauging and especially Communist, foreign reaction to the limited test ban treaty.

The first publication, "Foreign Radio and Press Reaction to the Moscow Nuclear Test Ban Agreement," is a country-by-country roundup of all foreign radio comment on the signing of the treaty as of 29 July. A two-page summary of world reaction appears at the head of the document; Soviet, Chinese, and satellite reaction is reported in detail beginning on page 17.

The "Survey of Communist Bloc Broadcasts" dated 8 August provides a detailed analysis of Communist propaganda on the subject. A one-page summary on page 1 is followed by a 10-page examination of salient propaganda themes.

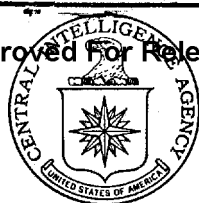

The third document, "Trends and Highlights of Communist Bloc Broadcasts," dated 14 August, is essentially an updating of the second.
